

WEBINAR

WEDNESDAY, 26 January 2022
09:00-10:30 GMT

Implementing indirect cost policies: Challenges, insights and lessons learnt

Cost: Free

[Register here](#) by Monday 24 January 2022

The joining instructions will be sent to registered participants on 25 January 2022

The recovery of indirect costs from research grants and contracts that contributes to sustainable research environments is for various reasons challenging for many institutions. This webinar will introduce the *Five Keys to Research Costing and Pricing in Low- and Middle-Income Countries* good practice document that was developed by ESSENCE on Health Research, a global funders initiative. Institutions will share their challenges, insights and lessons learnt regarding the implementation of indirect cost policies and the webinar will furthermore explore some of the technical aspects related to indirect cost calculation. A global research funder will share a funder's perspectives on grants management and indirect cost recovery.
