RE: RESUMPTION OF LECTURES

The University Management has noted with concern this morning's disruption of lectures by a few students led by the outgoing Chairperson of KUSA.

It is important to note that this was done in complete disregard of the KUSA Student Governing Council and Congress, who were not consulted on the issues raised. In addition, these issues had not been communicated to the University Management using the laid down channels.

The Management is holding consultations with KUSA Leadership on issues affecting students, and will soon be issuing a statement on decisions made.

Meanwhile, we urge all students to remain calm and continue attending classes from tomorrow as scheduled while the said issues are being addressed.

Thank you.
