

Founded in 1993, Gwangju Institute of Science and Technology (GIST) has pioneered innovative research and educational initiatives, such as establishing Korea's first liberal arts based collegiate science curriculum, which comprises extensive educational exchange programs, with distinguished universities around the world.

GIST has grown over the past three decades to include an increasingly diverse group of talented students and prominent professors from around the world who work tirelessly together to achieve greater scientific and technological successes with the goal of becoming a top-tier global university by 2035.

What is GIP?

The Global Internship Program (GIP) offers students from countries around the world an opportunity to experience research at GIST by assigning them to a research lab for eight weeks during the summer to receive valuable training and mentoring from the lab's professor. Many international students have gained both theoretical knowledge and practical training in research thanks to the GIP program.

International undergraduate students who are currently seniors or international students enrolled on a master's program are eligible to apply for the GIP.

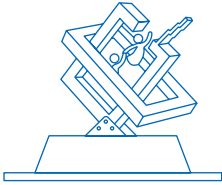

Reimbursement of one-way flight	Dormitory housing
Special lectures	Korean language classes
Culture classes	Stipend
Final poster session presentation	

- Online application
February to early March
- Shortlist announcement
late April
- Program period
mid June to mid August (8 weeks)

Students who are admitted to the program will be assigned to a specific laboratory where they will receive research training under the supervision of the professor in charge of the laboratory. More information about the participating laboratories can be found on the IPA website.

GIST promises to be the best for the future of society and humanity.

Application Procedure

1. Apply online

- Visit the GIST IPA website (ipa.gist.ac.kr)
- Create an account with your email address
- Fill out the online application form
- Select two preferred labs and upload a research plan to complete the application

2. Upload required documents

- Original (official) degree certificate (i.e., proof of enrollment or graduation certificate)
- Original (official) transcript in English
- Letter of recommendation
- Certificate of English language proficiency

Your Future at GIST

GIST encourages applications from candidates who show strong academic potential, are highly motivated to pursue a career in the field of science and technology, and are keenly focused on their intellectual and professional interests.

Studying at GIST

- Intensive education for highly-qualified students
- Research-oriented graduate programs
- Academic departments specializing in key areas of science and technology

Benefits for International Students

Tuition exemption

Monthly stipends + allowance (for GPA 3.0+)

Dormitory housing

Reimbursement of one-way flight

Medical insurance

GIST International Student Association (GISA)

Advanced degree programs

- M.S. degree programs
- Ph.D. degree programs
- M.S./Ph.D. degree programs

GIST Research Institute

World-class research is what GIST is all about. With our outstanding faculty, state-of-the art facilities, and abundant opportunities for collaboration, GIST provides one of the best research environments available anywhere in the world today.

Advanced Photonics Research Institute

Integrated Institute of Biomedical Research

Research Institute for Solar and Sustainable Energies

International Environmental Research Institute

Korea Culture Technology Institute

GIST Institute for Artificial Intelligence

Center for Quantum Conversion Research

GIST Advanced Institute of Instrumental Analysis

Laboratory Animal Resource Center

Academic Schools & Departments

- School of Electrical Engineering and Computer Science
 - Department of Semiconductor Engineering
- School of Materials Science and Engineering
- School of Mechanical and Robotics Engineering
- School of Environment and Energy Engineering
- School of Life Sciences
- Institute of Integrated Technology
 - School of Integrated Technology
 - Graduate School of Energy Convergence
- Department of Physics and Photon Science
- Department of Chemistry
- Department of Biomedical Science and Engineering
- Artificial Intelligence Graduate School

International Graduate Admission Application Deadlines

Apr. 15

for fall semester
starting in
September

Oct. 15

for spring semester
starting in
March

* The detailed schedule is subject to change.
