WORKSHOP ON SOCIETY AND INVASIVE SPECIES:

registration/contributed presentation submission open

This two-day workshop will focus on the control of invasive species in complex and conflictual social contexts.

The workshop aims to bring together empirical researchers, environmental professionals and theoreticians to share perspectives on invasive species control in a social context. It will emphasize management in the face of disparate interests as well as nonviolent or violent conflicts. With participants from diverse parts of the globe, the workshop aims to help form interdisciplinary connections that lead to relevant research and effective social and environmental interventions.

Registration form:

https://docs.google.com/forms/d/e/1FAIpQLSdemFsr3fsurctapDTxUDvJ7N-bjMxY2-IDWggml7hL_oPBoTw/view-form

**TUESDAY, JUNE 13
– WEDNESDAY,
JUNE 14, 2023**

Registration is free but mandatory. Twenty in-person registrations are available.
